(54) METHOD AND APPARATUS FOR CREATING SENSIBILITY, AND SOFTWARE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for creating sensibility by which sensibility in a state similar to a human being is outputted, and provide an apparatus for creating sensibility, and a recording medium.

SOLUTION: Personality information subjected to sensibility developing which determines at least reason and the will is previously held. Status information which indicates the emotion of an opponent or an environmental status is inputted. Instinctive motivation information which includes at least a first instinct parameter indicating a degree of comfort, a second instinct parameter indicating a degree of risk, and a third instinct parameter indicating a degree of achievement or a degree of change is created based on the status information. Emotional information including at least a basic emotional parameter of pleasure, anger, and grief is created based on the created instinctive motivation information. The created emotional information is controlled based on the personality information.

LEGAL STATUS

[Date of request for examination]

12.12.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
